ULTRA PREMIUM

ECOGLOSS™

NEXT-GEN SHATTERPROOF SCREEN PROTECTION
FOR MACBOOK NEO

The future of screen protection has arrived. Made from 100% recycled materials, EcoGlass™ features a flexible, shatterproof design that provides crystal-clear screen protection while maintaining true touch sensitivity and responsiveness—without any risk of cracking. Engineered with 9H scratch resistance, it helps defend against everyday scratches and wear while preserving display clarity.

Constructed from environmentally responsible 100% recycled polymer, this ultra-thin (0.15 mm) screen protector delivers edge-to-edge coverage and is designed specifically for MacBook Neo. Smooth, chamfered edges ensure a premium feel, while compatibility with most popular cases provides seamless protection.

EcoGlass™ also features an innovative integrated dust removal layer that lifts dust and particles from the display before final installation, ensuring a cleaner, easier application.
