

# Configuration Services

Streamline your device configuration with SYNLogistics and deliver great device experiences for your clients', right out of the box.

Whether it's a single device or a bulk order of thousands, we enable our partners to enhance their business operations and elevate capabilities for their customers.

## Pre-configuration Services

### ✓ Hardware Upgrades

Enhance device performance with the latest hardware components, ensuring optimal functionality and speed. Including RAM, SSD, HDD, CPU, GPU and more.

### ✓ White Glove Services

Provide a personalized touch with end-to-end setup, including hardware configuration, software installation, and user customization.

### ✓ MDM Deployment

Implement Mobile Device Management to centrally manage and secure your clients devices.

### ✓ Imaging

Streamline deployment by creating standardized system images, saving time and ensuring consistent configurations.

### ✓ Enterprise Server Builds

Tailor and optimize server setups for enterprise needs, maximizing efficiency, security, and scalability. Build, DOA, RAID & OS.

### ✓ Windows Autopilot

Provision new Windows devices and simplify device management right out of the box, preparing them for productive use.

✓ **Test and Tag electrical cables**

Ensure cable infrastructure reliability by thorough testing, tagging, and organizing to prevent power cable failures.

✓ **BYOD Education Bundling Programs**

Bundling of student/teacher notebook with accessories in carry bag repackaged ready for shipping.

✓ **Device skins**

Customize device appearances to align with corporate branding, enhancing brand visibility and professionalism.
